EC - PWM - A2 - MPC1 - H  PWM Driver

Description
Microprocessor-based PWM electronic driver for remote control of a dual-coil proportional solenoid valve.

Operation
The EC-PWM-A2-MPC1 Proportional Valve driver supplies a double solenoid with a PWM (Pulse Width Modulated) current proportional to the input signal from a potentiometer, PLC or other control systems.

Proportional valve A is controlled with an input command signal varying from 2.5 to 4.5 Volt.
Proportional valve B is controlled with an input command signal varying from 2.5 to 0.5 Volt.
An auxiliary ON-OFF type solenoid can be energised anytime the input signal goes out of the 2.25 - 2.75 V range.

Features
- The current in the solenoid is independent from any change in the coil resistance or in the supply voltage.
- The inherent superimposed dither frequency helps to overcome friction and stiction effects in the controlled device.
- Supply line is protected against reversed polarity.
- Input is protected against short circuits to GND and supply.
- Outputs are protected against short circuits, reversed polarity, over-current and over-temperature.
- The EC-PWM-A2 circuit is potted inside a plastic enclosure suitable for panel mounting by means of 2 set screws.

Specifications
- Operating voltage: 8 - 32 Vdc
- Max current consumption: 100 mA (no load applied)
- Operating temperature: -25 / +85 °C
- Degree of protection: IP 68
- Analog input signal: 0.5 - 2.5 - 4.5 Vdc
- Input impedance: 40 kOhm
- Typical ctrl pot resistance: 2 - 10 kOhm
- PWM drive frequency: 100 Hz
- Current output range (PWM): 100 - 1500 mA
- Current on/off output: max 3A
- PWM on/off output: 10 bits
- Optional DT04-8P Deutsch connector

Applications
- 12 Vdc and 24 Vdc systems
- Remote control of proportional valves
- Field-adjustable applications
- Control of a proportional bi-directional valve with a venting valve

WARNING: The specifications/application data shown in our catalogs and data sheets are intended only as a general guide for the product described herein. Any specific application should not be undertaken without independent study, evaluation, and testing for suitability.
**EC - PWM - A2 - MPC1 - H**

**PWM Driver**

**Adjustments**
- Two rotary trimmers are located on the rear potted surface to provide the following field adjustments:
  - Imin (minimum output current)
  - Imax (maximum output current)

**Application Example**
- Proportional control of a dual coil valve from a bi-directional lever, joystick or roller.

**Ordering Information:**
- EC - PWM - A2 - MPC1 - *
- A = trimmer adjustable version
- H = potted plastic Housing
- C = circuit board only

**Part Numbers**
- 23.0409.138
- 23.0409.109

**WARNING:** The specifications/application data shown in our catalogs and data sheets are intended only as a general guide for the product described herein. Any specific application should not be undertaken without independent study, evaluation, and testing for suitability.
