Electro-Hydraulic Components
Electronic Controllers
Machine Management Systems
Radio Remote Controls

Complete Control Solutions
Solenoid oper. Cartridge valves
- 2w-2pos NC & NO/Spool type **
- 2w-2pos NC & NO/Poppet type ****
- 3w-2pos/Spool type ***
- 4w-2pos/Spool type ***
- 4w-3pos/Spool type **

Proportional Cartridge Valves
- Pressure relief valves **
- Direct acting Pressure reducing Valves *
- Pilot-operated Pressure reducing Valves **
- 2-way NC & NO Flow Controls/Spool type***
- 2-way NC & NO Flow Controls/Poppet type ****
- 3-way priority type Flow regulators ***
- 2-way-press. compensated Flow regulators ***

HBC-radiomatic product line
Applications for:
- Construction cranes
- Lift Equipment
- Mobile Machinery

PWM Drivers
- Single proportional outputs
- Dual/bi-directional proportional outputs
- Up to 4 bi-directional proportional outputs

RC-DBR Radio Remote Control
- Ergonomic Grip
- Combined ON/OFF and PWM single hand radio control
- Wired back up connection

Machine Management Systems
- up to 40 digital/analog inputs
- up to 44 power/signal outputs

Proportional Actuators
- MLT/FD4: analog type
- electro-hydraulic proportional actuator
- with position sensor and built-in electronics
- MLT/FD5: digital type with CAN bus
- electro-hydraulic proportional actuator
- with position sensor and built-in electronics
- Machined interface adapters and servo-piston kits for any Make of Directional Control Valves with position

TDV-MPX - Directional Valve
- Load sensing configuration
- Individually pressure compensated
- Electro-hydraulic proportional actuators
- Electro-hydraulic ON-OFF actuators
- with meter-in proportional control of pump flow

FLOW RATINGS:
- * Up to 20 lt/min
- ** Up to 45 lt/min
- *** Up to 75 lt/min
- **** Up to 150 lt/min

Joystick Controllers
- Mini/uni-directional levers
- Mini/bi-directional levers
- Heavy duty/single axis levers
- Heavy duty/multi-axis joysticks
- Fingertip proportional roller switch
- Fingertip proportional rocker switch
Custom Controls Inc specializes in providing complete control solutions for both mobile and industrial applications.

With our extensive product offering, in house engineering and knowledge, we are able to provide components that will integrate seamlessly into your existing machine or provide complete systems that will get your latest project up and running as quickly and smoothly as possible.

Custom Controls works with an “inside out” mentality. First gaining an understanding of what you want your machine to do and how you want it to do it. So many product providers work only out of a catalog requiring you to gain the knowledge of their product to specify what you need. We want to understand YOUR product and to work together to make your vision come to life.
